Online language assessment tests

A Bright tomorrow...  
since 1990

- Market leader amongst French companies with more than 250,000 tests a year.
- A presence in 80 countries.
- 11 languages tested and 14 interface languages.

Bright Language provides a Human Resources tool that is simple and reliable for rapidly and effectively assessing the language level of your co-workers. This allows:

- The creation and personalisation of Internet platforms suitable for your organisation.
- The administrators can assign tests with their access codes at any time.
- Immediate results.
- Access to overall company statistics.

Many multinational corporations such as Total, BNP Paribas, Safran, Manpower, Valéo and Solvay have chosen to work with Bright for recruitment and training. They are highly satisfied with the performance of the platform and the test results.

Online language assessment tests

## Generic Bright tests

### 11 Languages tested

French, English, German, Spanish, Italian, Portuguese, Brazilian, Dutch, Swedish, Mandarin Chinese and Russian.

The test lasts between 30 and 40 minutes.

Each test consists of 2 parts:

- 60 multiple-choice written questions assessing grammar and syntax
- 60 multiple-choice oral comprehension questions.

The results can be consulted immediately on your administrator account:

- A first report details candidates' written and oral abilities on a scale from 0 to 5 that can be correlated with the levels of the Common European Framework of Reference for Languages (CEFR).
- A second report shows the grammar points that need to be improved.
